PROFESSIONAL SUMMARY

B.E. graduate in Artificial Intelligence and Data Science with hands-on experience in machine learning, data preprocessing, feature engineering, model evaluation, and AI engineering. Experienced in developing ML, RAG, and AI-powered applications using Python, Scikit-learn, FastAPI, LangChain, and Ollama, with a focus on building reliable and data-driven solutions. Familiar with working with structured and unstructured data, REST APIs, databases, Docker, and Kubernetes fundamentals. Strong foundation in machine learning, deep learning, data science, and core computer science concepts, with a keen interest in ML pipelines, model deployment, automation, reproducibility, and MLOps.

EDUCATION

Datta Meghe College of Engineering, Airoli

Bachelor of Engineering (B.E.) in Artificial Intelligence and Data Science
Mumbai University | CGPA : 7.57

Nov 2022 - Jun 2026

S.S.S. Multi Purpose Technical College, Ghatkopar

Higher Secondary Certificate (HSC) – Maharashtra State Board | Percentage : 70.67%

Jun 2021 - Mar 2022

Dominic Savio Vidyalyaya

Secondary School Certificate (SSC) – Maharashtra State Board | Percentage : 81.6%

Jun 2019 - Mar 2020

PROJECTS

Credit Card Fraud Detection System

Technologies: Python, Scikit-learn, Pandas, NumPy

Github : [Credit-Card-Fraud-Detection](#)

- Developed a machine learning system to classify fraudulent credit card transactions using historical transaction data.
- Performed data preprocessing, exploratory data analysis, and feature engineering to prepare data for model training.
- Trained and compared classification models using Precision, Recall, and F1-score to evaluate performance.
- Analyzed transaction patterns and model errors to improve fraud detection accuracy and reduce false positives.

LLM-Based Document Question Answering System

Technologies: Ollama, Ollama Embeddings, JavaScript, HTML, CSS

GitHub : [LLM-Document-QA-System](#)

- Developed a Retrieval-Augmented Generation (RAG) based document question-answering system using Ollama.
- Implemented PDF upload, semantic search, and Ollama Embeddings to retrieve relevant document content.
- Built a responsive web interface with an integrated PDF viewer supporting highlighting and bookmarking.
- Generated context-aware answers from uploaded documents, improving information retrieval accuracy.
- Optimized document retrieval by leveraging semantic similarity to deliver relevant and context-aware responses.

Customer Support AI Agent

Technologies : Python, FastAPI, LangChain, Ollama, ChromaDB, SQLite, Sentence Transformers, Streamlit

Github : [Customer-Support-AiAgent](#)

- Developed an AI-powered customer support system using Python, FastAPI, and LangChain to automate customer query resolution.
- Implemented a hybrid RAG pipeline combining BM25 and ChromaDB vector search with Reciprocal Rank Fusion (RRF) for relevant context retrieval.
- Built persistent conversation memory and CRM lookup using SQLite, with LLM-based response evaluation to improve reliability.
- Designed modular REST APIs for integrating AI components and supporting scalable workflows.

TECHNICAL SKILLS

Programming Languages: Python, C++, SQL, JavaScript

Machine Learning: Scikit-learn, TensorFlow, Machine Learning, Deep Learning, NLP, Data Preprocessing, Feature Engineering, Exploratory Data Analysis, Model Evaluation, Classification

AI & LLM: RAG, Generative AI, LLMs, AI Agents, LangChain, Ollama, Sentence Transformers, Semantic Search, Hyperparameter Tuning

MLOps & Backend: FastAPI, REST APIs, Docker, Kubernetes (Fundamentals), Model Deployment, Git, GitHub

Data & Databases: Pandas, NumPy, Matplotlib, MySQL, PostgreSQL, Firebase Firestore, ChromaDB, Vector Databases

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks
